

# Assignment 2 – CSE102

**Total points: 30**

**Submission deadline: Sunday October 20 11:59 PM KST**

## Synopsis

Assignment 2 of the CSE102 course will focus on create HTML ONLY site with as much content as possible. After completing this assignment, you will have concrete understanding of the HTML tags, look and feel as well as intended functionality. Your submission should address the elements described in the following sections.

## Proper HTML Layout (5 pts)

Your website follows a proper HTML layout for ALL the site pages. You can design your own HTML layout or use one of the suitable layouts available from the following page:

<http://www.draac.com/htmlextratablepage.html>

<https://www.ironspider.ca/webdesign102/tables4layout2.htm>

Most of these layouts do not use any CSS code. There is a very little amount of JavaScript code that checks browser suitability. You can leave it as it is there. If required, you can add tables to hold images and content.

HTML table examples: <https://html.com/tables/>

## Textual Content (5 pts)

All the textual content on all the pages is complete along with proper proof-reading and no grammatical mistakes. Those who prefer to add content in Korean language, it will be checked by a native Korean speaker person.

## Proper Linking (5 pts)

All the navigation links in all the pages must work properly. The information architecture, textual navigation links, and site organization are done to provide a skeleton for the final site design and production work. System for navigation is mostly in place.

## Pictures and Images (5 pts)

Each page must be filled with images and picture content as much as possible. If you anticipate a picture on a page but have not gotten the right picture yet, you at least must pub in a div box with the dimension of the picture and a description of what picture is envisioned there. For example the div could say [Restaurant Entrance Picture Here] or [Marching band video here].

It is not necessary to create HTML forms (such as signup or feedback) at this stage. We will do form handling later when we will study JavaScript.

### Site Hosting (3 pts)

Create a folder assignment2 in your Infinity server account space and host your site there – where index.html is the entry point to the site. Provide link to the hosted site on blackboard.

### Reference Sites Info (2 pts)

Also mention which reference sites have you analyzed to guide your design and organization efforts. Name at least 3.

### Task Distribution List (3 pts)

The task distribution list is further revised and refined mentioning who did which tasks for the Assignment 2.

### Submission (2 pts)

- 1) Provide link to the hosted site on blackboard.
- 2) Create a ZIP of your Website and upload it on blackboard.

Submission Deadline -> Sunday 20 October 2019 11:59 PM Korea time
