

Assignment 3 – CSE102

Total points: 37.5 **Submission deadline: Saturday May 16 11:59 PM KST**

Synopsis

Assignment 3 of the CSE102 course will focus on creating HTML + CSS site with fully functional content. After completing this assignment, you will have concrete understanding of the HTML + CSS functionality, look and feel as well as intended functionality. Your submission should address the elements described in the following sections.

Proper CSS Layout and Design (10 pts)

Your website follows a proper HTML + CSS layout for ALL the site pages. You can design your own CSS layout and CSS stylesheets or modify one of the available suitable layouts available from the following pages:

<https://purecss.io/layouts/>

<https://colorlib.com/wp/css-layouts/>

Choose the layouts without any JavaScript code (except for the code that checks browser suitability). You can leave it as it is there. If required, you can add tables to hold images and content.

Kindly use external CSS stylesheet/s for your website. Experiment and use CSS elements we have learnt in the class.

Complete Textual Content (4 pts)

All the textual content on all the pages is complete along with proper proof-reading and no grammatical mistakes. Those who prefer to add content in Korean language, it will be checked by a native Korean speaker person.

Complete Proper Linking (5 pts)

All the navigation links in all the pages must work properly. The information architecture, textual navigation links, and site organization are done to provide a skeleton for the final site design and production work. System for navigation is mostly in place.

Complete Pictures and Images (6 pts)

Each page must be filled with images and picture content with complete details.

It is not necessary to create HTML forms (such as signup or feedback) at this stage. We will do form handling later in the next assignment after studying JavaScript.

Site Hosting (4 pts)

Create a folder assignment3 in your Infinity server account space and host your site there – where index.html is the entry point to the site. Provide link to the hosted site on blackboard.

Reference Sites Info (2 pts)

Also mention which reference sites have you analyzed to guide your design and organization efforts. Name at least 3.

Task Distribution List (3.5 pts)

The task distribution list is further revised and refined mentioning who did which tasks for the Assignment 2.

Submission (3 pts)

- 1) Provide link to the hosted site on blackboard.
- 2) Create a ZIP of your Website and upload it on blackboard.
- 3) Submit a document containing basic information, details of site hosting, reference site info and task distribution separately on blackboard.

Submission deadline: Saturday May 16 11:59 PM KST
