

Assignment 4 – CSE102

Total points: 37.5 Submission deadline: Sunday 7th June 11:59 PM KST

Synopsis

Assignment 4 of the CSE102 course will focus on responsive design and creating and adding HTML + JavaScript forms to your website with fully functional form checking and display of submitted form information. After completing this assignment, you will have concrete understanding of the responsive design and HTML + JavaScript functionality. Your submission should address the elements described in the following sections.

Login/Signup functionality (10 pts)

On your website homepage, create a button with caption Login. On clicking the Login/Signup button, a popup window appears that displays a page containing two forms side by side as follows:

Please login	Sign Up
<input type="text" value="Email Address"/>	<input type="text" value="First Name"/> <input type="text" value="Last Name"/>
<input type="text" value="Password"/>	<input type="text" value="Email"/>
<input type="checkbox"/> Remember me	<input type="text" value="Password"/>
<input type="button" value="Login"/>	<input type="text" value="Confirm Password"/>
	<input type="checkbox"/> I accept the Terms of Use & Privacy Policy.
	<input type="button" value="Sign Up"/>

- 1) A dummy login form: See this example for details: <https://www.daniweb.com/programming/web-development/code/330933/a-simple-html-login-page-using-javascript>
 - A. You will check whether entered username and password match a pre-defined username and password. If not, then an error message window is shown.)
 - B. The form will disappear after information in the correct format is entered. The Login/Signup button in the main page will also disappear and a message will be displayed at that place with text: 'Welcome – [Email]'.
- 2) A dummy signup form for new account creation: This signup form will accept user's first name, last name, valid email address, password as well as confirm password inputs. Following restrictions are to be enforced using JavaScript:
 - C. First Name and Last Name should accept only Alphabets (no numbers and special characters) with maximum length of 15 characters for each.
 - D. Email address should be valid.
 - E. Password should be 8 characters long with a mixture of lowercase, uppercase, number and special characters.
 - F. All fields are compulsory.
 - G. Text entered in Password and Confirm Password fields should match. In case there is no match, alert should be shown.

- H. The form will disappear after information in correct format is entered. . The Login/Signup button in the main page will also disappear and a message will be displayed at that place with text: 'Welcome – [Email]'.

A Visitor Feedback and Contact Us functionality (12 pts)

On your website create new links for **Feedback** and **Contact**. On clicking these links, Feedback and Contact pages will be displayed respectively. If you already have a Contact or Feedback page, modify that page for taking into account following functionality:

- 1) An example a feedback page with feedback form is given in the following. You may want to use radio buttons to represent check-box input. Following restrictions are to be enforced using JavaScript:
 - A. Email and Name are optional.
 - B. All text box inputs are optional.
 - C. All radio button inputs are mandatory.
 - D. The feedback boxes should have at most 500 characters length.
 - E. After the form is submitted, the form should disappear and the page should show what is submitted by the user.

WEBSITE FEEDBACK FORM

Phone	Company Name
Subject	
Description	
<input type="button" value="Send"/>	

Rubric:

Login/Signup functionality:

- 1) Login/Signup button: 2 pts
- 2) Dummy login form: UI – 2 pts, Correct working: 2 pts.
- 3) Signup form: UI – 2 pts, Correct working: 2 pts
- 4) Feedback/Contact links: 2 pts
- 5) Website feedback form: UI: 3 pts, Correct working: 3 pts
- 6) Contact us form: UI: 2 pts, Correct working: 2 pts

Responsive Mobile Friendly Layout (10 pts)

Your website should follow a proper layout when accessed using a browser on mobile smart phone. You can make some changes in CSS layout to make your website mobile friendly. Go through the tutorials on the following page to make suitable changes to your website CSS so it looks mobile friendly:

<https://www.thesitewizard.com/css/mobile-friendly-responsive-design.shtml>

<https://developers.google.com/web/fundamentals/design-and-ux/responsive>

This technique is called responsive design, where the same web page will be presented for both desktop and mobile users. Only the Cascading Style Sheets, or CSS, will be different. That is, browsers on desktop/laptop computers will render the page using one set of CSS instructions, while those on mobile phones another.

Rubric:

- 1) Changing CSS for making it responsive: 5 pts

- 2) Actual responsive website view on mobile device: 5 pts

Site Hosting (2 pts)

Create a folder assignment4 in your Infinity server account space and host your site there – where index.html is the entry point to the site. Provide link to the hosted site on blackboard.

Task Distribution List (2 pts)

The task distribution list is further revised and refined mentioning who did which tasks for the Assignment 3.

Submission (1.5 pt)

- 1) Provide a link to the hosted site on blackboard.
- 2) Create a ZIP of your Website and upload it on blackboard.

Submission deadline: Sunday 7th June 11:59 PM KST
